Summary

Software developer and Information Technology graduate with hands-on experience building and deploying full-stack applications using React, Node.js, Express.js, and relational and NoSQL databases. I am developing a strong focus on backend engineering, software architecture, and the design of reliable and scalable systems. My projects demonstrate practical experience with RESTful APIs, authentication, database design, API integration, and layered backend architectures. I am continuously strengthening my skills in data structures and algorithms, system design, cloud technologies, and scalable software development, with the goal of building robust systems that solve real-world problems.

Education

University of Ghana

Bachelor's Degree • GPA: 3.67 / 4.00

BSc Information Technology

Legon, Accra • Dec 2021 - Sep 2025

- **Thesis:** Systematic Review on Improving Pose-based gait Recognition (Multi-view Techniques)
- **Relevant Coursework:** Artificial Intelligence, Data Structures & Algorithms, Computer Networks, Wireless Systems & Networks, Systems Administration, Systems & Network Security, Human Computer Interaction, Software Engineering, Advance Database Management.

Awards and Certifications

University of Ghana Scholarship

2023

University of Ghana

<https://apply.ug.edu.gh/finaid>

Professional Experience

ManazTechnologies & Solutions

Madina, Accra

Software Engineer

Oct 2024 – Dec 2025

- Designed and developed secure backend systems using Node.js and Express, implementing authentication with JWT.
- Built and optimized database schemas using MongoDB with Mongoose and Sequelize for efficient data management.
- Documented and tested APIs using Postman, integrating validation workflows into CI/CD pipelines.

<https://www.manaztech.com/>

University of Ghana Computing Systems (UGCS)

University of Ghana

Software Developer (Intern)

March 2024 - April 2024

- Introduced to Drupal-based Content Management Systems (CMS) and basic web development workflows
- Assisted with technical documentation and internal support tasks
- Collaborated with software teams on real system operations

<https://ugcs.ug.edu.gh>

ManazTechnologies & Solutions

Fullstack Developer (Intern)

- Developed responsive web applications using React, Vite, and Tailwind CSS, ensuring performance and usability.
- Architected and integrated RESTful APIs with Node.js/Express, handling asynchronous data flow across the application.
- Implemented state management using React Hooks and Context API, improving scalability and maintainability.

<https://www.manaztech.com/>

Madina, Accra

Jun 2024 - Nov 2025

Teaching and Research Experience

Department of Computer Science

Teaching Assistant (National Service)

Teaching Assistant (Ongoing)

- Conduct and supervise lab sessions to support students understand course materials
- Assist in course activities including quiz invigilation, grading, and managing student assessments
- Collaborate with my instructor to ensure smooth delivery of teaching and learning activities

Research Assistant (Ongoing)

- Conducting a systematic review on generative models, focusing on diffusion models, Variational Autoencoders(VAEs), Generative Adversarial Networks (GANs) and Flow-based generative models.
- Contributing to structured research documentation and report writing
- Developing understanding of modern deep learning approaches in generative models

Legon, Accra

Nov 2025 - Present

Volunteering

ZIZI Foundation

Legon, Accra

- Organizing and distributing donations to charity homes.
- Participating in communal labor and projects to improve local infrastructure.

<https://gh.linkedin.com/in/zizi-foundation-ghana-179486272>

April 2023 - present

Projects

Personal Portfolio & CMS | Next.js, TypeScript, MongoDB, Tailwind CSS, REST APIs

- Designed and deployed a full-stack portfolio application with a public-facing interface and separate administrative dashboard for managing projects, skills, and experience.
- Developed RESTful API endpoints and reusable data-fetching logic for dynamic content retrieval and updates from MongoDB.
- Implemented a content management workflow that enables administrators to modify portfolio data without directly changing application code.
- Deployed on Vercel with Next.js rendering and performance optimization capabilities.

<https://adam-muhammed.vercel.app/>

Online Bookstore (Vite, Node.js, Express.js, MongoDB)

- Built and deployed a fullstack e-commerce web application for browsing and purchasing books

- Implemented features such as product listing, shopping cart, and checkout functionality
- Designed responsive UI and integrated backend APIs for data management

<https://book-store-app-mern-umber.vercel.app/>

Scalable Blog REST API (In development) | Node.js, Express.js, PostgreSQL, Prisma, JWT

- Designing and developing a RESTful backend using a layered architecture separating routes, controllers, services, and data-access logic.
- Implementing JWT-based authentication with access and refresh tokens, HTTP-only cookies, protected routes, and logout functionality.
- Building core blogging features including user management, posts, likes, and comments with PostgreSQL and Prisma ORM.
- Applying relational database design, input validation, transactions, middleware, and indexing considerations to improve maintainability and scalability.

<https://github.com/amuhammed005/scalable-blog-system/tree/main>

Multi-Election Voting System | React, Node.js, Express.js, MongoDB, Cloudinary

- Developed and deployed a secure web-based voting system supporting multiple independent elections.
- Implemented user authentication and vote validation to ensure one vote per user per election
- Developed election management, vote recording, and results/statistics functionality.

<https://election-system-mern-dqcj.vercel.app/>

Movie Library Application (API Integration Project)

- Developed a web application that integrates with an external movie API to retrieve and display movie information.
- Implemented asynchronous data fetching and dynamic rendering of API responses using JavaScript.
- Designed a user-friendly interface for browsing and searching movie data.

Skills

Languages

Python, JavaScript, HTML/CSS, Typescript, SQL

Frontend Frameworks

React.js, Vite, Tailwind CSS, Next.js

Backend

Node.js, Express.js, REST APIs

Databases / ORM

PostgreSQL, MongoDB, Prisma, MongoDB Atlas

Tools & Platforms

Git, Github, Vercel, Render, REST APIs, Cloudinary, Redis, Docker / Docker Compose, AWS, Nginx
